

Company Profile

Directors:

**Pfano Motlhasedi
Lebogang Mokomane**

Company Information & Background

Lebili Enterprise was established by Women who decided to empower themselves by establishing a business enterprise aimed at the company participating in the mining industry. Lebili Enterprise supplies tyres and onsite tyre management services

We are a proudly South African, 100% women owned company on a Level 2 BBBEE level. Our vision is to break the way forward for woman in mining

Our expertise on the different levels of the industry, gives us the edge to cater for your precise needs. By meeting our clients critical needs in a time conscious environment is what sets us apart.

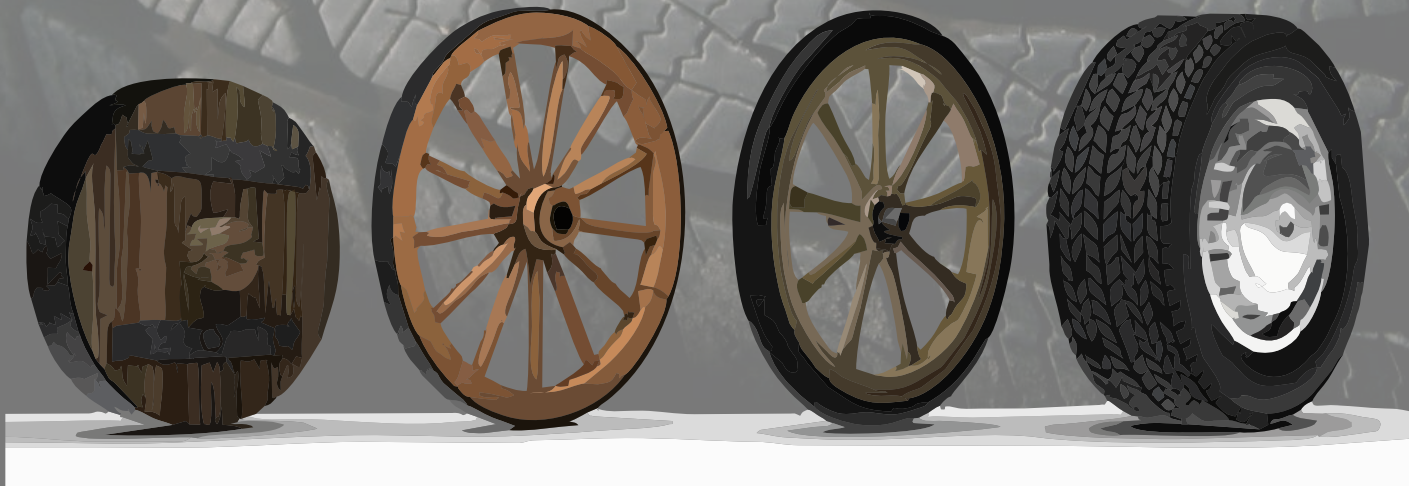

Company Vision

Lebili's vision is to become a significant mining company in South Africa, dedicated to development of the country and woman by engaging in enterprises that will contribute directly and indirectly to economic development of women in the industry and the country

Company Mission

Lebili will participate meaningfully in the opportunities offered by the new Mining Charter that seeks to transform and extend participation equitably to all the people of South Africa.

Core Strategies

Lebili runs a viable business entity.

We engage best skills and expertise to assist in making informed decisions.

We encourage liaison between companies and other mining houses, small and big to enhance participation in the mining industry.

Lebili to utilize the DMR to improve our business.

To engage in beneficiation activities where applicable.

To join women organization in the mining and related industries that are prompting women in the industry.

Our Services

We offer a comprehensive on site tyre management services that includes but are not limited to:

- Skilled on site teams inspecting, monitoring off all running wheels*
- Performance monitoring of all running wheels.*
- Weekly underground surveys to identify problematic areas*

Our Products

BRIDGESTONE
Your Journey, Our Passion

OFF-THE-ROAD TIRES
VSMS2
V-STEEL SMOOTH TREAD-MS 2

Load Haul Dump

Dramatically evolved durability for underground mining

MAIN FEATURES

- Innovative sidewall shape
- 30% reduction in sidewall cut frequency extends total life
- Superb casing durability
- Reduced operational downtime
- Wider range of sizes

VSMS2 OFF-THE-ROAD TIRES

Tire size	Star rating	TRA code
17.5R25	*2	LSS
26.5R25	*2	LSS
29.5R25	*2	LSS
29.5R29	*2	LSS

NEW

Wed 2 Sep

BRIDGESTONE OFF-THE-ROAD TIRES
VSMS2 V-STEEL SMOOTH TREAD-MS 2

Thanks to dramatically improved sidewall cut resistance, the new VSMS2 tire lasts longer and reduces operational downtime, delivering even greater productivity.

Sidewall cut resistance

Sidewall cuts tend to occur during loading. The VSMS2 has a more vertical sidewall shape than the original VSMS during loading, reducing the chance of damage by 30% and leading to an extension of total lifespan.

Cross-sectional view

Previous model VSMS2

More vertical shape is less likely to catch stones, especially when the vehicle is backing, reducing risk of sidewall cut.

Sidewall cut frequency to ply cord

Wider size range

Now also available in 29.5R25 size, for use in a wider range of underground mining applications.

Tire Size	Type	Star Rating	Rec Rim/ FL Height	Approximate Inflated Dimensions
